

BLACKOUT SHADES PORTFOLIO

RECENT PROJECTS

We invite you to bask in the splendor of our latest Blackout shade projects.

About Us

We specialize in providing high-end window coverings for customers who expect excellence and personalized service from their provider.

What We Do

Our team of specialists will visit your location, conduct an on-site consultation, and offer turnkey installation services.

Why Us

With over 25 years of experience in upscale commercial and residential window treatments, ShadeMonster, is your trusted one-stop shop for window blinds and shades.

What Sets Us Apart

Our products are hand crafted in the USA and delivered directly from our private factory. 100% client satisfaction guaranteed from start to finish. 1-5 year warranty on all products.

BEFORE

AFTER

SIDE CHANNELS

Adding side channels to your blackout shades ensures there won't be any light gaps from the sides of your window shades. Achieve a darker room and better sleep. Ideal for nurseries and bedrooms.

VALANCE

Window valances create a sleek border covering the roller tube and hardware to provide a flush look. Not only do they enhance your window aesthetically, they also help insulate your window. Fabric cassettes are valances with fabric matching your shade over top to create a seamless window appearance.

AVAILABLE COLORS

WHITE

ANODIZED

IVORY

BLACK

CHAIN - MANUAL OPERATION

BLACK

WHITE

SILVER

Roller shades come standard with manual operation using chains. Choose between plastic (black or white) or metal (silver).

Corded blinds or shades need to be locked in so that children and pets are unable to mess with them. Dangling cords or strings can become a threat or hazard. To secure the cord, it needs to be anchored down and locked into the side of the shade. ShadeMonster window treatments always come with a cord anchor to tightly secure chains and cords.

MOTORIZATION

Motorized shades eliminate dangerous cords and create a safe environment for your children and pets. Adjust one window covering or a group of coverings for ease and convenience. Control your shades with a remote control, free smartphone app, or upgrade to a smart hub to use Google Assistant or Amazon Alexa to control your shades with voice commands.

SMART HUBS

Control your shades with a remote control, free smartphone app, or upgrade to a smart hub to use Google Assistant or Amazon Alexa to control your shades with voice commands.

HARDWIRE

A hardwired plug-in motor is a motor that is directly wired to an electrical source, such as an outlet or light switch. These motors are typically installed by a professional and require a licensed electrician to ensure proper installation.

BATTERY OPERATED

Battery operated motors are motors that are powered by batteries, typically rechargeable ones. These motors are typically less expensive than hardwired motors and can be easily installed by anyone with basic DIY skills. Battery operated motors are ideal for smaller window treatments, such as blinds or shades, as they can support lighter loads.

ShadeMonster Basic Collection
