

How To Group Your Somfy Motorized Shades

Please Read and Follow These Instructions.

STEP 1 - Check that you have set up your remote(s)

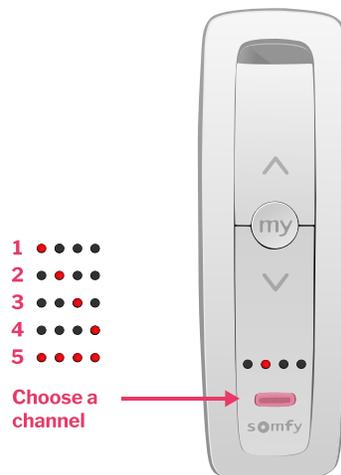

Before you group your blinds, follow the steps in the Battery powered or Wired tabs in this guide to add every blind to your remote(s).

STEP 2 - Choose a blind to group

For 5 channel remotes click the channel button at the bottom of your remote to select the channel of the blind you're wanting to group. The red light displays which channel you're on. You'll group each blind one by one, following steps 1 to 6 here.

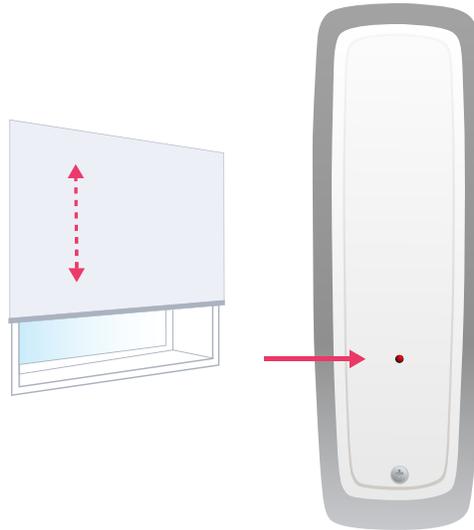

For 1 channel remotes you can skip this step. Just have the remote handy for the blind you're wanting to group.

STEP 3 - Put the blind into programming mode

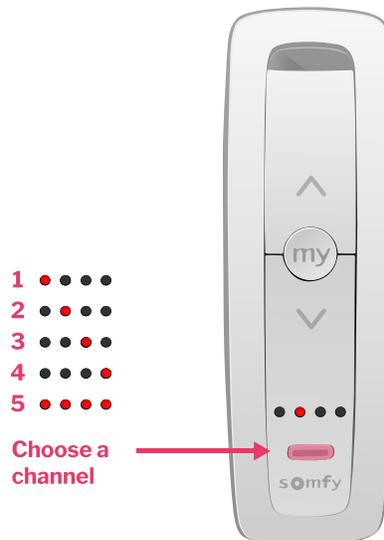

Grab a paperclip or pin and hold down the program button on the back of your remote, until your blind jogs.

STEP 4 - Choose your group channel

For 5 channel remotes click the channel button to select the new channel you want to group all your blinds on.

If you're grouping on a separate 1 channel remote, grab the remote.

STEP 5 - Add your blind to your group channel

Grab a paperclip or pin and press the program button on the back of the remote you're grouping your blinds on **for less than a second**, which will make your blinds jog. Well done, you can now control your blind on the original channel or remote and on your group channel!

Adding your blinds didn't work? Make sure you press the program button quickly, for less than 1 second. If it didn't work, wait a few minutes then try again from step 2.

STEP 6 - Repeat to group more blinds

Follow steps 1 - 5 here to add more blinds to your group channel or remote.
